PROFESSIONAL SUMMARY

Associate Product Manager candidate with technical fluency in software systems and experience gathering requirements, translating stakeholder needs into user stories, and supporting Agile product delivery. Strong communicator skilled at aligning business goals with engineering execution, managing cross-functional priorities, and driving measurable outcomes in fast-paced environments.

EDUCATION

University of Maryland, Robert H. Smith School of Business Dec 2026

Master of Science, Information Systems

Keshav Memorial Institute of Technology Dec 2021 – May 2025

Bachelor of Technology, Information Technology

TECHNICAL SKILLS & TOOLS

Product Management: Requirements Gathering, User Stories, Backlog Grooming, Sprint Planning, Roadmaps, Feature Prioritization, Agile, Scrum, Release Readiness, Cross-functional Execution

Technical: Python, SQL, APIs, Git, SDLC, Testing & Validation, Microsoft Office, Excel

Documentation / Analysis: PRDs, Functional Specs, Process Mapping, KPI Dashboards, Reporting, Competitive Analysis

Business: Stakeholder Management, Executive Communication, Problem Solving, Risk Identification

EXPERIENCE

XR Project Lead | XR Innovation Lab, University of Maryland, College Park, MD Apr 2026 – Present

- Gathered stakeholder requirements and translated business needs into prioritized user stories, feature scopes, and execution plans across multiple initiatives.
- Facilitated communication between technical teams and stakeholders through status updates, milestone reporting, and risk escalation.
- Supported testing, validation, and iteration of product features before launch

PROJECTS

AI-Assisted ATO Documentation & Validation System Feb 2026 – Present

- Supported product planning for a compliance workflow tool by documenting requirements, milestones, business rules, and success metrics.
- Built automated workflows that reduced manual review effort and improved operational scalability.
- Coordinated feedback loops, identified risks, and drove iterative improvements that reduced rework and improved quality.
- Conducted competitive analysis to benchmark features and support roadmap decisions.

Global Happiness Insights Platform Sep 2025 – Dec 2025

- Built predictive Python models and dashboards to identify trends and support data-driven business recommendations.
- Managed project deliverables, timelines, and stakeholder presentations across multiple priorities.

Consumer Health Tracking App Dec 2024 – Feb 2025

- Gathered user feedback and analyzed onboarding friction points to define feature improvements for the digital customer journey.
- Prioritized backlog items that increased daily active users by **15%**.
- Built dashboards tracking activation, retention, and adoption metrics to guide product decisions.
- Developed clickable prototypes to validate workflows before engineering handoff.
